

Somil Garak

Software Developer & Computer Science Student

somilror200@gmail.com · 0433 135 015 · Melbourne, VIC, Australia · github.com/somilror200

PROFESSIONAL SUMMARY

Computer Science student at Deakin University with hands-on experience building responsive web applications and working across frontend, backend, API, database, mobile and cloud development. Practical exposure to React, Vue, Node.js, ASP.NET Core, REST APIs, SQL databases, Git, Docker and Google Cloud Platform through academic and personal development work. Brings strong problem-solving, reliability and teamwork developed while balancing university study with long-term construction employment. Seeking software developer, software engineer, web developer, graduate, junior or internship opportunities.

TECHNICAL SKILLS

Core Development	C++, C#, Java, Kotlin, Python, JavaScript, SQL
Web & UI	React, Vue 3, HTML5, CSS3, responsive web development
Backend & APIs	Node.js, Express.js, ASP.NET Core / Web API, REST API development and integration, Swagger / OpenAPI, Postman
Data	PostgreSQL, SQLite, Microsoft SQL Server
Mobile	Android development with Java/Kotlin, React Native
Cloud & Tools	Google Cloud Platform, Docker, Git, GitHub, branching workflows, debugging

SELECTED PROJECTS

Responsive Company Website — Subcon Pty Ltd

- Developed and deployed a responsive company website using React, JavaScript, HTML and CSS, with layouts designed for desktop and mobile users.
- Published the production site through GitHub Pages with a custom domain, applying Git/GitHub version-control workflows during development.

SmartStock — IoT-Enabled Automatic Stock Management & Delivery System

- University distinction-task project: an IoT-enabled system automating stock tracking and delivery scheduling for supermarkets.
- Building Node.js microservices and Node-RED flows to process live sensor data, with planned AWS deployment.

EDUCATION

Deakin University — Bachelor of Computer Science

Melbourne, VIC · In Progress

- Relevant study: Object-Oriented Programming, Data Structures and Algorithms, Database Management, Software Engineering and Embedded Systems.
- Member of the Deakin Software and Electronics Club (DSEC) — technical workshops, projects and peer learning.

PROFESSIONAL EXPERIENCE

Formwork and Concrete — Subcon Pty Ltd

Truganina, VIC · March 2022 — Present

- Perform formwork and concrete preparation for residential construction, including site set-out, boxing, framing, measuring and preparation for concrete placement.
- Read construction plans and engineering details to complete work accurately and identify dimensions, levels, structural requirements and sequencing.
- Work closely with crew members and supervisors to meet daily construction targets, resolve on-site issues and maintain quality standards under time pressure.
- Maintain reliable attendance and balance ongoing employment with university study, demonstrating time management, accountability and adaptability.

Member — Deakin Software and Electronics Club (DSEC)

Deakin University · July 2023 — Present

- Participate in software, electronics and technical learning activities while collaborating with other students on practical problem-solving.
- Engage with peers and industry-focused events to strengthen software-development knowledge and professional communication.

COURSES & CERTIFICATIONS

Learning C# Algorithms — LinkedIn Learning · SQL for Data Science — Coursera · Android App Development — Udemy
